

Dr. Junya Michanan

CRMA

Class Seminar

To learn and adapt in the world
of AI and Machine Learning (ML)

What is AI & Machine Learning

Artificial Intelligence

Any technique which enables computers to mimic human behavior.

Machine Learning

Subset of AI techniques which use statistical methods to enable machines to improve with experiences.

Deep Learning

Subset of ML which make the computation of multi-layer neural networks feasible.

ML Market (North America)

\$8.43 billion

2019

\$117.19 billion

by 2027

AI + ML Market World)

\$14.69 billion

2019

\$190 billion

by 2025

Data-Driven World

By 2025, it's estimated that 463 exabytes of data will be created each day globally – that's the equivalent of 212,765,957 DVDs per day!

UNSTRUCTURED DATA

Social Media

Machine Learning and AI needs data to process

Class Seminar:

The AI trend in various sectors in 2021

Goals:

1. Give examples of AI technologies and applications in the sectors
2. How the technologies/applications effect our life, society and the world?
3. How do we learn and adapt to live with the future of AI?
